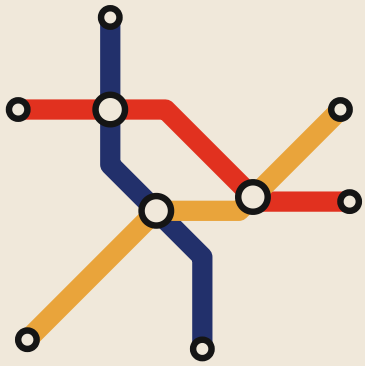
ALEXANDRE BERTHON

0 → 1 Fullstack Engineer · ex-CPO



Paris, France

alexandreberthon.pro@gmail.com in/alexandreberthon gh/alexberthon

CAREER PROFILE

I do my best work where nothing exists yet. Ex-CPO turned fullstack engineer, I take features from the first conversation to production, then iterate. TypeScript and Rails daily.

EXPERIENCES

2025 → now

Fullstack Software Engineer

Faks · Paris, FR · Since May 2025

B2B platform where pharmaceutical labs run commercial deals with pharmacies. Shipping features across backend, web and mobile.

- **AI invoice auditing:** supplier invoices are parsed by an LLM, then matched against the pharmacy's actual orders to catch overbilling. Heavily refactored the matching engine and built a regression suite replaying human-validated results to catch quality drift
- **MCP server:** built Faks' MCP server, opening the platform to AI agents. Designed the tools with an eval harness (headless agent + LLM judge): −40% tool calls and −74% token cost at 100% accuracy on our benchmark
- **Partner integrations:** synced deals from lab partner portals that have no public API, using backend adapters and a TypeScript Chrome extension
- **Payments:** integrated a second payment provider alongside the existing one. Rolling out to 20 labs this quarter
- **Automated invoicing:** built invoice generation end-to-end: PDFs, email delivery, exports, on web and mobile
- **Reliability:** API idempotency keys on web and mobile, eliminating duplicate submissions from double-clicks and retries
- **Close to users:** pharmacy support and API-integration meetings with labs. On-call rotation

Founder/Developer

TrainStory · Paris, FR · Since June 2023

Trip planner for rail journeys through Europe.

- Route search: custom A*-based algorithm finding multi-leg rail journeys
- Solo build: product, design and code, self-hosted on a bare-metal Linux server I maintain and monitor

2018 → 2023

Chief Product Officer

Calizy · London, UK & Paris, FR · May 2018 - February 2023

Led product for 2 iOS/Android/web apps with a team of 3 developers across Europe: Coorganiz, a B2C app for organizing small communities, and Calizy, a B2B appointment-booking SaaS.

- Several thousand end users and a dozen B2B clients
- Turned client needs into roadmap, specs and QA
- Built the Calizy landing page (Next.js) and internal tooling scripts

EDUCATION

Arts et Métiers Engineering School
MSc in Engineering
2012 - 2015

ESSEC Business School
MSc in Management
2015 - 2018

SKILLS

FRONTEND
TypeScript, React, React Native, Next.js, Hotwire

BACKEND
Ruby on Rails, PostgreSQL, Redis, Sidekiq

AI
LLM pipelines, MCP, Claude Code, Conductor

OPS
Linux, Sentry, New Relic, GitHub Actions

DESIGN
Figma

LANGUAGES

French	Native
